June 30, 1974

THE HONORABLE GEORGE R. ARIYOSHI
Acting Governor
State of Hawaii
Honolulu, Hawaii

Dear Governor Ariyoshi:

The Department of Transportation respectfully submits its annual report for the fiscal year ending June 30, 1974.

During the year, we were faced with the severe energy crisis; however, with your leadership, the department was able to overcome the difficulties of effectively transporting our people and goods, via the highways, sea lanes and air, while the crisis was at its peak.

It is interesting to compare our fiscal year 1964 annual report with this one and see the changes that have taken place in ten years.

In our 1964 letter to Governor John A. Burns, we stated that a contract was granted to complete the new jet runway at General Lyman Field, Hilo. Today, due to the growth of airline traffic and the increase in passengers at General Lyman, preliminary work is underway for a new and larger terminal.

A decade ago, the annual report discussed the problems of providing a seaward jet runway at Honolulu International Airport and the difficulties in acquiring land and financing. In fiscal year 1974, the injunctions against construction of the Reef Runway were lifted and work again commenced.

Also, the 1964 annual report mentioned that "the first Hawaii unit of the National Interstate and Defense Highway went under construction." Today, we are pleased to report that 87 per cent of the H-1 Freeway is completed or under contract, and that H-2 is 94 per cent completed or under construction.
Ten years ago, we were talking about container service on the four major islands. In fiscal year 1974, we have progressed to roll-on/roll-off vessels and to the development of facilities for the jetfoil inter-island ferry service.

The department is proud of the outstanding progress made over the past ten years, and we look forward to the future, with the promise of developing and implementing the best and most viable land, sea and air transportation systems for Hawaii.

Very truly yours,

E. ALVEY WRIGHT
Director

State Department of Transportation

HISTORY AND PRESENT ORGANIZATION

The State of Hawaii Department of Transportation exists to fulfill the State's responsibilities in providing facilities for all modes of transportation--air, sea and land.

Hawaii's State Department of Transportation was the nation's first state-level agency to bring together under a single cabinet officer the task of planning, building, maintaining and operating airports, highways and harbors and integrating them into a balanced transportation system.

The Department of Transportation was created by an Executive Order signed by the Governor on January 20, 1960, as part of the reorganization of Hawaii's government pursuant to Statehood.

The Department incorporates functions of three former independent agencies--the Highway Department (originally part of the old Territorial Department of Public Works), the Board of Harbor Commissioners, and the Hawaii Aeronautics Commission.

All of the commercial airports, harbors and barge landings in Hawaii are under this single public agency, the Department of Transportation. It also administers four general aviation airports and about 20 small boat harbors. Federal aid for eligible State and County highways is administered through the Department of Transportation. At present about 975 miles of highways are maintained by the Department.

The Department is headed by a Director who is appointed by the Governor. It is one of 17 "cabinet departments" in the State Government.

The three major program divisions of the Department--the Airports, Highways and Harbors divisions--are each headed by a Chief who reports to the Director.

The Director presently has four Deputy Directors--one each assigned to functional special areas. Other Staff Officers include the Departmental Personnel Officer, Property Management Officer, Business Management Officer, State Transportation Planner and Departmental Computer Engineer.
A Staff Officer who occupies a special category is the Assistant State Highway Safety Coordinator. He supports the Director in the latter's role as Acting State Highway Safety Coordinator and Chairman of the Hawaii State Highway Safety Council. The Council is an advisory board to the Governor which was established by the Hawaii Highway Safety Act of 1967 to meet requirements of the National Highway Safety Act of 1966.

The State Constitution provided for a Commission on Transportation to sit in an advisory capacity to the Director of Transportation. Nine memberships are stipulated, one for each of the original senatorial districts and three for the State at large. Appointments are made by the Governor for staggered terms of four years each.

The Director of Transportation serves ex officio or by special appointment or invitation on a wide range of boards, commissions and committees.

From time to time, he has been assisted by committees appointed by the Governor for special tasks, such as the masterplanning of Honolulu International Airport.
AIRPORTS DIVISION

During fiscal year 1974, the expansion and improvement program for the State's Airport System continued at a rapid rate. More than $18 million of improvement projects were completed or underway.

Among the completed projects, the following are listed as of interest.

Honolulu International Airport (HIA)

Work began on the new Reef Runway on May 7, 1973, but appeals by environmental groups to the Ninth Circuit Court of Appeals and the U. S. Supreme Court resulted in two separate injunctions and suspension of all off-shore work for a total of 112 days. The Supreme Court on April 22, 1974, let stand the lower court's decision upholding the legality of the environmental impact statement and permitted work to resume.

Major projects undertaken at HIA during fiscal year 1974 were as follows:

An $8.2 million project to provide additional B-747 gates at the Diamond Head Concourse. The contract will provide three more holdrooms for wide-bodied aircraft.

A $211,000 landscaping project of the ground level and approach to the enplaning and deplaning roadway.

A $280,000 landscaping project of the International Arrivals and Ewa Extension of the main terminal.

A $544,000 contract to relocate Elliot Street. This project was undertaken in coordination with the new Postal Services facility for efficient handling of mail to and from the airport.

A $570,000 project to improve and realign Lagoon Drive. The section between Nimitz and Aolele will be improved with curbs, gutters and sidewalks with appropriate underground utilities. The realignment at the South Ramp will make available more area for aeronautical use.

General Lyman Field

In December, 1973, the State and the airlines reached an agreement on the extent of the New Terminal at General Lyman Field. As a follow-in to the agreement, an $8.3 million contract was awarded for the site work, grading, drainage and paving of the aircraft apron, terminal site, parking lot and access road and for the utilities to the new facilities.
Also undertaken at General Lyman Field were security and certification provisions.

Perimeter and security fencing was installed as well as a lighting system for the aircraft apron and parking lot.

**Waimea-Kohala Airport**

Security fencing at Waimea-Kohala Airport was also undertaken during the year. A contract of $10,000 will correct those security deficiencies at the airport.

**Ke-ahole Airport**

An $80,000 contract was awarded and work is underway for terminal improvements at Ke-ahole Airport. The work will provide facilities for the air taxi operators and a fire station to centrally house the fire trucks.

The ground transportation base yard was completed in March, 1974. Rent-a-car operators are proceeding with construction of the service areas.

**Kahului Airport**

At Kahului, the ground transportation subdivision was completed. This $221,000 contract provided the final paving of the lease lots for the ground transportation operators at Kahului.

Now underway, at Kahului, is the installation of fencing around the aircraft operation areas. The $100,000 contract provides for perimeter and security fencing in accordance with Federal regulations.

**Molokai and Lihue Airports**

At Molokai and Lihue Airports, fencing contracts were awarded. The projects involve the furnishing and installing of perimeter and security fencing at a cost of $118,000 and $80,000 at Molokai and Lihue, respectively.

Other projects undertaken during the year at Lihue Airport were:

A $10,000 contract for furnishing and installing safety glass in the main terminal.

The installation of air conditioning of the ticket and waiting lobbies, at a cost of $145,000.

A visual guidance lighting system, at a cost of $43,000. This system, installed at the approach to Runway 3, will permit the safer landings of aircraft at Lihue Airport.
On January 2, 1974, the "off-duty" police who were providing security services required by Federal Aviation Administration Regulations were replaced by Hawaii Protective Association, Ltd. personnel. Under the provisions of a one-year contract, the security service for all State airports is being provided by a private security organization, at a cost considerably less than under the previous arrangement.

On June 1, 1974, a new Animal Quarantine Station was placed in operation at Honolulu International Airport. The facilities are provided at no cost to the State Department of Agriculture, which provides the necessary personnel for manning twenty-four hours per day. This new service eliminates the previous practice of airlines holding animals in their cargo terminal and will facilitate the quarantine processing of animals and birds imported into Hawaii.

Distinguished visitors to Honolulu International Airport during the year included Queen Elizabeth of England, other leaders of foreign nations bordering the Pacific Basin, governors of several states, cabinet officers, congressmen and returning astronauts.

Work is progressing satisfactorily to provide security fencing at the airports that serve certificated carriers. Some exemptions were granted by the Federal Aviation Administration and by the time the exemptions expire in 1974, all deficiencies will have been corrected.

In fiscal year 1974, passenger traffic at all State airports continued to show significant increases over the preceding fiscal year. Similar increases were seen in cargo moved by air and more modest increases were noted in air mail.
CONSTRUCTION CONTRACTS AWARDED BETWEEN
JULY 1, 1973, AND JUNE 30, 1974

OAHU

Honolulu International Airport

Landscaping of the Enplaning/Deplaning Roadway Approach Ground Level
and the Parking Area. 0-90-12(7)A.
October 18, 1974.
$211,908.74.

Millwork and Furniture for Third Level Holding Rooms,
International Arrivals. 0-90-3(25).
(A) Amfac, Inc.; (B) Western Contract Furnishers, Inc.
(A) $17,115.66
(B) $24,002.00.

Demolition and Fill of Continental Airlines Lease Property.
0-90-12(36).
Hi-Way Transportation & Contracting Co., Ltd. Contract awarded
$180,819.00.

Covered Walkway between Parking Structure and Pedestrian Underpass.
0-90-5(25).
July 15, 1974.
$71,380.00.

Landscape: Ewa Extension Main Terminal Building. 0-90-12(7)B.
$278,684.00.

Furnishing and Installing Security Fencing and Related Work. 0-98.
James J. Gomes, dba Jimmy's Fencing. Contract awarded January 4,
$59,385.50.

Concrete Apron Repairs. HIA-74-13.
Completed April 5, 1974.
$42,577.00.

Diamond Head Concourse Gates 7, 8, and 9. 0-90-2(12)B.
$8,163,000.00.
Honolulu International Airport (cont'd)

Furnishing and Installing Furnishings for Addition to Governor's Lounge. 0-90-20(1)B.
Completed August 3, 1974.
$18,324.00.

Improvements and Realignment of Lagoon Drive. 0-96-2.
$570,000.00.

Elliott Street Relocation and Parking Lot Modifications. 0-96-1.
$544,210.00.

Inclined Conveyors, International Arrivals.
$134,442.00.

HAWAII

General Lyman Field

May 20, 1974.
$121,970.00.

Repainting of the Air Cargo Building. GLF-74-3.
Completed October, 1974.
$7,283.00.

Grading, Paving and Utilities. H-91-1(2)R.
$8,009,069.95.

Clearing and Grading. H-91-1(1).
Completed March 29, 1974.
$187,880.80.

Removal and Replacement of the Control Tower Cab Glass Windows.
GLF-74-2.
Completed May 9, 1974.
$13,716.00.
Ke-ahole Airport

Terminal Improvements. N-3.
$75,000.00.

Repainting of Airfield Markings. KLH-74-1.
George G. Glenn. Contract awarded March 5, 1974. Completed
April 24, 1974.
$8,696.48.

Waimea-Kohala Airport

$8,421.50.

MAUI

Kahului Airport

$24,066.48.

Furnishing and Installing Security Fencing and Related Work. M-104.
$99,517.00.

Molokai Airport

$108,120.00.

Lanai Airport

Completed June 7, 1974.
$11,525.00.
KAUAI

Lihue Airport

Completed May 10, 1974.
$42,641.00.

February 28, 1974.
$9,500.00.

Air Conditioning Ticket and Waiting Lobbies. K-43.
Completed May 22, 1974.
$135,090.00.

STE-74-5.
$24,066.48.
CONSTRUCTION PROJECTS UNDERWAY DURING FISCAL YEAR 1974
UNDER CONTRACTS AWARDED PRIOR TO JULY 1, 1973

OAHU

Honolulu International Airport

Construction of the Ewa Gull Wing Gate Positions 28, 29 and Turnaround. 0-90-2(21)A.
$2,810,000.

Direction & Location Signs Installation, Phases II & III, for the Terminal Building. 0-90-12(6).
$666,000.00.

$1,260,000.00.

Printing, Collating, Storing and Delivering Bid Packages and Other Material. 0-90-11(3)B.
$9,352.00.

Construction of Baggage Claim Area Diamond Head (Existing Terminal Building). 0-90-3(19)A.
$661,830.00.

Remodel and Addition to Ticket Lobby Area. 0-90-3(9)B.
$1,545,000.00.

Relocate Five Existing Carousels to International Arrivals. 0-90-10(9).
$164,195.00.
Honolulu International Airport (cont'd)

Dredging, Offshore Grading and Drainage and Protective Structure for Reef Runway. 0-93-7(1).
$46,374,039.00.

Furnishing, Delivering, Installing & Testing Public Address System. 0-90-9(12)B.
$88,743.00.

Addition to Governor's Lounge and Alterations to Administration Building. 0-90-20(1)A.
$171,386.00.

Relocation of Bird Habitats for Reef Runway. 0-93-8(3).
$350,881.00.

Relocation of Airlines Offices (Braniff International and Philippine Airlines). 0-90-13(6)A.
$42,000.00.

HAWAII

Ke-ahole Airport

Paving of Ground Transportation Facilities and Lease Parcels.
H-101B.
$287,331.00.

MAUI

Kahului Airport

Paving for Ground Transportation Subdivision. M-91-4.
Completed April 17, 1974.
$210,586.00.
Kahului Airport (cont'd)

Construction of Chlorination Building. M-100.
Completed June 14, 1974.
$19,695.00.

DEPARTMENTAL ADMINISTRATION

Foremost in the departmental administrative activities was the appointment and confirmation of E. Alvey Wright as Director of Transportation. Admiral Wright had been serving as Acting Director of Transportation since May 16, 1973, when Dr. Fujio Matsuda resigned to accept a vice-presidential position at the University of Hawaii.

Major landscaping activities, under the direction of the Deputy Director for Operations, consisted of four highway projects and one project at the Honolulu International Airport. The highway projects were H-3, from the Kaneohe Marine Corps Air Station to Halekou Interchange; Puuloa Interchange; Moanalua Valley, from Halawa Interchange to Puuloa Interchange; and Kalihi Interchange.

The Honolulu International Airport project consisted of landscaping the ground level of the elevated roadway system and the ground level and second and third levels of the ewa extension and international arrivals building.

Shortly after the commencement of the new fiscal year, final steps were taken to recruit for the two vacant highway safety specialist positions in the Office of the State Highway Safety Coordinator. The two positions were filled in the first week of October, bringing the staff to full strength.

In addition, during the fiscal year, the half-time position of fatality file analyst was upgraded to full time.

On October 30, federal approval was received to implement the fiscal year 1974 Annual Work Program for highway safety. Nearly $400,000 in federal funds from the U. S. Department of Transportation's Federal Highway Administration and National Highway Traffic Safety Administration were allocated.

Breakdown of funds and agencies are:

State of Hawaii:

Department of Personnel Services: $16,318 to teach defensive driving to state-employed drivers; Department of Health: $80,932 for three emergency medical services projects, including emergency medical technician training; Department of Transportation Highways Division: $31,000 for installation of milepost markers in Kauai, Maui and Hawaii Counties; Highway Safety Coordinator's Office: $71,732 for planning and administration of the highway safety program.
Maui County:

Maui Police Department: $25,481 for detecting and apprehending drunken drivers; Maui Police Department: $1,274 for driver license personnel training; Maui County Engineer: $9,718 for installation of traffic signs.

Hawaii County:

Hawaii Police Department: $40,000 for installation of 51 emergency telephones on rural highways; Hawaii Police Department: $15,302 for training in police traffic services; Hawaii Police Department: $5,378 for traffic records; Hawaii County Engineer: $11,960 for installation of traffic signs.

City and County of Honolulu:

Honolulu Police Department: $4,000 for breathtesting ampoules used in drunk driving arrests; Honolulu Police Department: $1,756 for police traffic services training; Honolulu Police Department: $33,333 for the fatal accident reduction program (driving under the influence of alcohol); Department of Health: $70,012 for emergency medical services technician training.

Kauai County:

Kauai County Engineer: $14,540 for upgrading traffic control devices; Kauai Police Department: $616 for training in police traffic services; Kauai County Engineer: $390 for traffic technician training.

The assistant state highway safety coordinator attended the regional administrators' fall meeting of National Highway Traffic Safety Administration (NHTSA) and FHWA and the annual highway and traffic safety conference of western states at Scottsdale, Arizona.

At the request of the U. S. Department of Transportation, the Office of the State Highway Safety Coordinator sent two of Hawaii's outstanding young people to another conference in Scottsdale. Hawaii's delegates attended the three-day national highway safety conference for young people between the ages of 16 and 24.

A two-fold public hearing was conducted on each of the Neighbor Islands on the rules and regulations governing the examination and qualification for licensing of drivers of heavy trucks, buses, school buses, tractor semi-trailer combinations and truck-trailer combinations, and the rules and regulations governing the use of traffic control devices at work sites on/or adjacent to public streets and highways.
The assistant state highway safety coordinator participated in the highway safety program management seminar, held in the State Department of Transportation building. This seminar was conducted by FHWA and NHTSA representatives from Washington, D. C. and San Francisco to instruct the newest members of the region - Guam and American Samoa - in the requirements for participation in the federal highway safety program. Officials from the Guamanian and American Samoa governments were in attendance, including Governor John Haydon of American Samoa.

Since NHTSA and FHWA are basing their traffic safety programs on Management By Objectives, four key members of the Highway Safety Coordinator's office attended a three-day intensive MBO workshop, sponsored by the U. S. Civil Service Commission.

Throughout this fiscal year, the State Highway Safety Council continued to meet and oversee Hawaii's traffic safety program. Five new members were sworn in by the governor to bring the Council membership to thirty-three.

Two of the newest council members worked with the Highway Safety Coordinator's staff to recommend a reorganization plan of the council. This reorganization should result in a more active and efficient State Highway Safety Council.

Legislation continues to be one of the vital areas of activity for the Council. In 1974, the Legislature passed, and Acting Governor Ariyoshi signed into law, two measures sponsored by the Council:

Act 80 corrects the ambiguities in the existing law regarding driver license categories and driver licensing requirements for the operators of heavy vehicles, including the certification of school bus drivers.

Act 133 makes several amendments to the Statewide Traffic Code, including sections regarding the definition of "school bus", "no-passing zones", "U turns", and "bicycle equipment operating regulations".

Some important measures failed to receive approval in both the 1973 and 1974 sessions of the Legislature. These were bills requiring the mandatory use of seat belts in vehicles; requiring a short refresher course and written examination for driver's license renewal; and requiring the notification of driver licensing and vehicle registration authorities of any name or address change by the licensee or owner.

Hawaii experienced 136 traffic fatalities and 7,723 injury-producing accidents in calendar year 1973, an 11.7% decrease from the 1971 all-time high of 154, and a 7% decrease from 146 in 1972.
This is a significant reduction since the total number of traffic accidents increased from 18,259, in 1972, to 19,544, in 1973 (6.6% increase). The 1973 number of people injured was 11,860, as compared to 11,141, in 1972 (6% increase).

The 1973 fatality total of 136 is the lowest in seven years, except for 133, in 1969. Since 1969, registered vehicles have increased 23% - 373,541 to 484,521. In the same period of time, licensed drivers have increased from 462,502 to 509,857 (9.3% increase).

Pedestrian deaths accounted for 24 of the 136 fatalities, or 18%, in calendar year 1973. This is one less than the previous year. Pedestrian accidents rose to 620, 78 more than 1972's figure of 542 (12.6% increase).

Of the 136 traffic fatalities occurring in Hawaii in calendar year 1973, 41 deaths on Oahu and 15 Neighbor Island deaths occurred at the scene of an accident; 5 people on Oahu and 7 people on the Neighbor Islands died enroute to the hospital. Thirty-six Oahu and 32 Neighbor Island people died after hospital admittance.

Motorcycle and other two-wheel motor vehicle deaths had been increasing rapidly until 1966, when 18 deaths were reported. In 1967, when the Hawaii Highway Safety Act was passed by the Legislature requiring standards on safety equipment be enacted for motorcycle riders, only eight motorcycle deaths were reported. Since that law went into effect, motorcycle fatalities have been reduced to only three in 1973--0.72 fatalities per one hundred accidents. Motorcycle accidents decreased 7% from 1972 and 27.8% since the 1967 Highway Safety Act.

The 1973 mileage death rate (traffic deaths per one hundred million vehicle miles of travel) for the State was 3.35 as compared with 3.89 for 1972. This is the lowest rate ever recorded.

The 1973 accident death rate (traffic death per one hundred traffic accidents) for the State was 0.70, as compared with 0.80 for 1972. This was the first time that the accident rate had ever been below the 0.80 mark.

There were 2,430 DUI (driving while under the influence of alcohol) enforcement arrests in 1973, compared with only 509 DUI arrests in 1972. This is an increase of 477%. This impressive statistic is a result of the FARE (Fatal Accident Reduction Program) program, police training in DUI detection procedures, and the increased emphasis by the police department in the alcohol countermeasures area.
The Advance Transportation Planning Office (ATPO) through the State Transportation Planner, continued to coordinate and direct the operation of the Oahu Transportation Planning Program. ATPO provided the necessary administrative staff functions and actively participated in the preparation of the first Overall Work Program - a compendium of planning activities and programs for the Island of Oahu.

In a coordinated effort with the Bureau of the Census, the ATP office continued its effort to finalize the editing of the Geographic Base File. Contact is being maintained with the Bureau to initiate the updating of the file.

To meet the need to maximize the usage of existing transportation facilities, the ATP office participated in the development and implementation of a computerized car pool system for the Island of Oahu. Bikeway planning, too, was actively pursued to encourage the safe and efficient utilization of bicycles as a mode of travel.

The 1974 National Transportation Study, requiring the participation of various State and County agencies was effectively coordinated by the ATP office.

Multimodal transportation planning and corridor analysis were conducted by the ATPO staff to evaluate the impact of both land and water mass transit systems upon the transportation plan for the island. Considerable time and effort, too, were expended on the Trans-Koolau corridor to study the allocation of projected trips to the various modes of travel.

The ATPO continued as the Department's liaison office for compliance with State and Federal regulations regarding project environmental impact statements. Another activity of the ATP office has been to coordinate the responses of the Department of Transportation's applications for Oahu General Plan amendments and zoning changes.

The Department's participation in the Statewide Planning, Programming and Budget Process was again coordinated by the ATP office.

The Programs and Contracts Office reported that the Legislature, through Act 218, Session Laws of Hawaii 1974, which amended Act 218, SLH 1973, authorized an appropriation of $12,188,000 for the Department of Transportation's Capital Improvements Program for fiscal year 1974. This amount was apportioned as follows: airports, $10,415,000; harbors, $910,000; highways, $863,000.

During fiscal year 1974, the Programs and Contracts Office processed 135 construction, purchasing, and maintenance contracts, totalling $75,502,860. In addition, this office processed 43 formal consultant contracts, totalling $5,750,000.
The Property Management Office provides staff services to the Director and to the three operational divisions in the management of revenue-producing lands and facilities under the control of the Department.

The revenue realized during the fiscal year from the occupancy of these lands and facilities are reflected by the breakdowns by divisions.

AIRPORTS DIVISION

1. Number of leases in effect as of June 30, 1974 126
2. Number of space permits in effect as of June 30, 1974 354
3. Number of leases issued during the past fiscal year 23
4. Number of leases to be negotiated during the coming fiscal year 58
5. Number of space permits issued during the past fiscal year 70
6. Approximate number of space permits to be renewed during the fiscal year 1974-75 354

Revenues from the rental of land and facilities totalled $32,932,376, during the fiscal year.

HARBORS DIVISION

1. Number of leases and licenses in effect as of June 30, 1974 111
2. Number of new leases issued during the past fiscal year 9
3. Number of revocable permits in effect as of June 30, 1974 156
4. Number of revocable permits issued during the past fiscal year 45

Revenues realized from the rental of land and facilities totalled $2,533,310.13, during the past fiscal year.
HIGHWAYS DIVISION

The activities of this division are generally limited to the rental and disposition of buildings affected by highway projects only. This activity during the fiscal year was as follows:

1. Number of outstanding revocable permits for fiscal year ending June 30, 1974
   39

2. Number of revocable permits issued during the fiscal year
   30

The amount of revenues realized from the rentals of all properties, during the fiscal year, was $58,093.63. There were no public auctions during the fiscal year.

The Budget and Internal Control Office provides the Department with fiscal and operational control services through coordination, review and evaluation of budgetary matters and through internal auditing of departmental activities.

The operating budget appropriations for the fiscal year ending June 30, 1974, include $1,512,946 for departmental administration; $34,101,177 for the Airports Division; $11,517,529 for the Harbors Division; and $23,017,312 for the Highways Division. The total departmental appropriations, as provided by Act 218, SLH 1973, amount to $70,148,964.

The Departmental Computer Engineer reported that over-all production processing leveled off this past year due to a drop in engineering-type processing; however, the previous year's total production level was maintained because of increases in non-engineering usages.

Last year's Annual Report foresaw an expected change of the on-site computer system. This change has not yet taken place due to a variety of causes. Proposals from the second "bid letting" are presently being evaluated, with the hope that the eventual system will be in place by the end of fiscal year 1974.

With the expected delivery of the above-mentioned system, preliminary work was started this past year to determine the "tele-communication" needs of some of the engineering computer services' users.

The host computer, the IBM 370/155, controlled by the Electronic Data Processing Division of the Department of Budget and Finance, underwent some additions and alterations during the past year. These changes will ultimately mean better service to the Department of Transportation, a service which during the past year was already excellent.
The Airports accounting system, as mentioned in last year's report, is in various stages of completion. Subsets that make up the system are in testing, programming, or parallel run stages. The expected completion date of July, 1974 was not met and has been pushed back to late 1974.

In engineering applications, the Wyoming Bridge Rating Program was put into production use and is now proving to be an invaluable tool for the bridge engineers who seek to conform to a federal requirement of rating the hundreds of bridges in our state highway system.

The Highways Division's Coordinated Data System, another project having far-reaching effect, remained largely in the planning stage, with the expected start to be during fiscal year 1974. Its completion should be a boon to the Highways Division employees who daily digest data such as material costs, historical bid prices and other related information.

The Departmental Personnel Office, by the end of June, 1973, filled two key positions, Departmental Labor Relations Officer and Departmental Training and Safety Officer, enabling the personnel office to start fiscal year 1974 with a full personnel complement for the first time since January 1, 1972.

As of June 30, 1974, the department was authorized 1,950.50 positions, distributed as follows: staff offices, 75; airports, 564.25; harbors, 260.25; and highways, 1,051.

Fifty-nine intra-departmental vacancies were announced. Thirty-four of these were filled by promotion of departmental employees.

Four informal and eight formal grievances were submitted as alleged violations of collective bargaining agreements. Two of these grievances were settled in favor of the department and four in favor of the claimant. Two grievances were settled within the department and three were submitted to the Department of Personnel Services. Three are pending settlement at this time.

Carl Nagami, Departmental Computer Engineer, and Stanley Fujiyama, Assistant Chief-Administration, continued to present the Supervisory Management Course - Part I - to the supervisors of the department. By the end of the year, an additional 76 supervisors had been trained, bringing the total SMC-I trained to 266. As of June 30, only 19 DOT supervisors had not completed SMC-I.

SMC-II training was started, under the direction of the Departmental Training Officer, and at year's end, 47 supervisors had been trained. By the end of the 1974 calendar year, 180 additional employees will have completed SMC-II.
A three-hour grievance procedure training program was developed and conducted by the training section for all supervisors in the department. With the Fair Labor Standards Act becoming effective May 1, 1974, for the state and county governments, the training section developed a program to train all personnel who would be involved in the act's implementation in the department.

In addition, training in Bargaining Unit 1 reopener and the interpretations of the bargaining unit contract was presented to all supervisors responsible for administering that contract. Training in reopener for Bargaining Unit 2, Bargaining Unit 3, and Bargaining Unit 13 will be presented to the same group in July, 1974.

On August 1, all open workmen's compensation cases were transferred from the divisions, and the administration of workmen's compensation for the department was centralized in the Departmental Personnel Office. One person now has the responsibility and the authority to accept or deny liability for each accident and to attend all workmen's compensation hearings to present and defend the DOT's case. By exercising close control over open cases and auditing all vendors' charges, the department has saved and recovered over $50,000 that would have been paid or otherwise lost.

A departmental safety organization and program has been developed for the Director's approval. Implementation will take place upon receipt of guidelines from the Department of Personnel Services which has been charged with the responsibility of establishing a statewide safety program.

A Department of Transportation pre-retirement counseling program, paralleling the Department of Education's plan, was developed and a pilot program presentation was made. The program will be implemented in July, 1974.

During the year, 233 personnel were certified in basic first aid, under the American Red Cross program. Forty more will be qualified in July, 1974. With these trained personnel strategically placed, the department will more than meet federal and state Occupational Safety and Health Act and FAA regulations for qualified first aid personnel.
ADMINISTRATIVE DIRECTORY
JUNE 30, 1974

Director of Transportation ............... E. Alvey Wright
Deputy Director for Administration .... Lawrence F. O. Chun
Deputy Director for Engineering ......... Munny Y. M. Lee
Deputy Director for Operations ......... Douglas S. Sakamoto

Staff Officers

Departmental Personnel Officer ........ George S. Rezents
Property Management Officer .......... Paul H. Arizumi
Business Management Officer ........ Noboru Hiraï
State Transportation Planner ........... Ah Leong Kam
Departmental Computer Engineer ....... Carl O. Nagami
Assistant State Highway Safety Coordinator Lawrence K. Hao

Division Chiefs

Airports .................................. Owen Miyamoto
Harbors .................................. Melvin E. Lepine
Highways ................................ Tetsuo Harano

District Officers

Oahu

Airport District Superintendent ........ William H. Kraft
Harbor District Manager ................. James B. McCormick
Highway District Engineer .............. Tit Mun Chun

Hawaii

North Hawaii Airport District Superintendent .... Philip A. Sykes
South Hawaii Airport District Superintendent .... Oswald A. Byrne
Harbor District Manager ................. Dennis E. Ruthrauff
Highway District Engineer .............. Charles L. Schuster

Maui

Airport District Superintendent ........ Thomas F. Hanchett
Harbor District Manager ................. Percy A. Lilly
Highway District Engineer .............. Harris S. Suyama

Kauai

Airport District Superintendent .......... Ralph W. Foster, Jr.
Harbor District Manager ................. Carl A. Forsen
Highway District Engineer .............. Edwin Nakano

FOR FURTHER INFORMATION

The Annual Report of the State Department of Transportation is intended to provide an overall view of the Departments' activities.

The three major divisions of the Department and their various branches also issue periodical or special reports of a more technical nature.

Persons interested in a special phase of the Department's operations are invited to direct specific requests for information to the division concerned.

Copies of major reports are usually available for examination at the Public Archives, the University of Hawaii Library, the State of Hawaii Library, the Municipal Reference Library, and the County Libraries of Hawaii, Maui and Kauai.

Persons interested in details of the Department's tentative long-range construction program are referred to the Governor's Capital Improvements Program.
PHOTO DESCRIPTIONS

Page 7 -- The ground is broken for the new terminal at General Lyman Field, in Hilo. Pictured is the initial work for an $8.3 million contract for site work, grading, drainage and paving of the aircraft apron. The new terminal is expected to be completed at the end of 1975.

Page 21 -- Kawaihæ Harbor is the newest and fastest growing port in the Hawaiian chain. This port provides shipping facilities for the south and west coasts of the Big Island, thus eliminating the costly transportation of goods and supplies from Hilo, 71 miles away.

Page 39 -- The Mauna Kea Access Road, completed on June 28, 1974, is the first of two increments that will provide an improved means of transportation to the Observatory summit site. It consists of 6.281 miles of two-lane, 20-foot wide pavement on or near an existing dirt road, from Saddle Road to Hale Pohaku.
